## Projects

---

### Cube Run : Game – [Github](#)

June 2020 – July 2020

- Cube Run is single player game created by me for my personal project.
- I have done coding in C# and designed game by my self.
- I created this game with help of Unity Game engine.

### Titan Travels : Travel management website – [Github](#)

June 2021 – Aug 2021

- team of 5: organized meetings, delegated tasks, helped teammates debug, etc.
- Implemented the entire login system to allow **CRUD** operations on the user list (**JavaScript, HTML, CSS**).
- Designed the overall website concept/layout, implemented non-responsive home & product pages.
- I have worked mainly on **backend part** .

### ShopUp – [Github](#)

Jan 2022 – Ongoing

- team of 6 : We Created a Android Application Using React native. Aimed to help furniture hardware shop to help small shops so that they can improve their business.
- I worked in fronted side and created major pages like profile page and product list page etc.
